

Please keep the strength behind the "No Call List" There is such a benefit from knowing that you can tell a harassing telemarketer or collection's agent that you are on this list. We only have so much time in a day and to waste one moment having to argue with someone to get them off your phone line is a crime. This change was one of the best things that has come out of our state capitol in a long time. Remember what it was like when you received unwanted calls and dreaded picking up the telephone or were in the middle of an important situation or expecting an important phone call only to have this kind of call come through. Please leave the "No Call List" as it is!
